INDIGESTION OR DYSPEPSIA. No medicine perhaps has ever been discovered which gives so much tone to the stomach and causes the secretion of a healthy gustric juice to decompose the food as Dr. Drake's Panaces.

Dr. Drake's Panacea is used with the greatest success in Rheumatic Compaints, especially such as chronic. It cures by driving out all impurities and foul humours which have accumulated fit the system, which are the cause of Rheumatism, 6cst, and Swellings of the joints. Other remedice sometimes give temporary reflef; this entirely eradicates the discusse from the system, even when the limbs and bones are dreaffally smollers.

Conservation can be coughe.—Cougha, Cetarth, Bronchitis, Spitting of Blood, Asthma, Difficult or profuse Expectoration, Hectic Flush, Night Sweats, Pain in the side to, have been cured, and can be with as much certainty as my other disease. A specific has long been sought for, but a vain until the discovery of Dr. Drake's Panneca. It is alid and safe but certain and effectious in its operation, and cannot possibly injure the most delicate constitution. We would carneatly recommend those afflicted to give it a risil—and we believe they will not have occasion to regret. The system is cleaned and strengthesed, the theers on he lungs are healed, and the patients gradually regain their small health and strength. Read the following:

TESTINONY.

Patha., Dec. 14th, 1847.

Daar Str.:—In reply to your question respecting the use of Dr. Drake's Paracca, I will say, that although a perfect disheliever in the existence of a Paracca, or ours for all diseases, however valuable it may be in certain conditions of the system, still I have believed that a curs for Consumption would be discovered sooner or later, and cuttosity led ms to try your medicine in two very inveterate cases. They were pronounced by the attending physicians to be Felloward consulterions and abandoned by them as in evaluates. One of the persons had been under the treatment of several very sible practitioners for a number of years, and they said she had "old fashioned Consumption symbine with Scrofula," and that she might linger for some time, but could not be permanently relieved. In both cases the effect of the Paracca has been most gratifying. Only four or five bottles were used by one of the persons before she began so improve rapidly. The other took about ten. I will only add that familiar as I am with consumption by inheritance and by extensive observation as a study, and knowing also the injurious effects in nine cases out of ten of tar, bouseset, and other vegetable tonics, as well as of many of the expectorants and sedatives, I should never have recommended by our most popular, and squaiffic playsithe best alterative that has ever been made. The jours is in accordance with a theory of Consumption broached in France a few years ago, by one of her most eminent writers on medicine, and now established by facts which admit of an dispute.

Very Respectfully Yours, L. C. GUNN.

To use the language of another, "Dr. Drake's Panacea in always salutary in its effects—never injurious. It is not as Opiate—it is not and Expectorant. It is not intended to lull the invalid into a fatal security. It is a great remedy—a grand healing and curative compound, the great and only remedy which medical science and skill has yet produced for the treatment of this hitheric unconquered malady. And no person afflicted with this dread disease, will be just to finned! and his friends, if he go down to the grave without testing its virtues. A single bettle, in most cases, will produce a favorable change in the condition of any patient, however low."

TO THE LADIES.

Testies of pale complexion and consumptive habits, and the sars debiliated by those obstructions which females as lable to, are restored by the use of a bottle or two, to thoom vigor. It is by far the best remedy ever discovered for weakly children, and such as have bad humors; being pleasant, they take it. It immediately restores the appetite, trought and color.

Nothing can be appetite,

rangth and color.

Nothing can be more surprising than its invigorating of eas on the human frame. Persons, all weakness and laude before taking it, at once become robust and full of eary under its influence. It immediate counteracts the stretchesses of the female frame.

To T. B. Peterson,—Having been requested to give my opinion on the merits of M'ALLIS TER'S SALVE, I am willing to enumerate some of the benefits which I have experienced in the use

In the spring of 1845, I had an attack of Ery-ipelas in my face which became very painful, and extended into one of my eyes, being attended with vir, my distress was great and I began to be fear

ul of leating my eye.

Although not much of a believer in what is commonly called quack medicines. I purchased a box and made an application to my face. To my surprise the pain soon ab that, and in a week a time it was entirely cured, and f firmly believe that it was the salve, under Providence that cured me.
From that time to the present. I have used the article as occasion required, and is every case where I have used it, I have found a decided benefit. At one time, on going to bed et night, my throat was so acre that I swa lowed with difficulty, but ly an application of the salve I was relieved before

Phave used it in case of burns, bruises sprains, and firsh cuts, all with the happirest effects, and one case of poisoning by a wild vine in the woods, has been dried up and cured by a few a plications. This Medicine is offered to the public under the assurance that there is no article in existence having stronger claims to their consideration. Being compounded by a regular Graduate of J. fier con College, Philadelpha, and a practising physician of twenty years' standing in Philadelphia his long experience has confirmed him in the opinion that a compound medicine was required to prevent and remedy the debilitation pr duced by residing in low, masmatic climates, and to counter at the pro-trating influences of many nervous disorders with which the human family are afflicted. DR. ALLEN is a well known physicism, and

has used the above medicine in his practice for 8 years with the most attorishing effect, having issred its qualities in above
FIVE THOUSAND CASES. No medicine ever received more flattering re-commendations from physicians of eminerit stand-ing than has been bestowed on this.

BYSPEPSIA OR INDIGESTION AND TS CONSEQUENCES .- An emittent Profes ITS CONSEQUENCES,—An eminent Professor says:—'It chiefly arises in prisons who lead either awery sedentary or irregular life. Although not regarded as a fatal disease; yet if neglected or improperly treared, may bring on incurable Melancholy, Jaundies, Maduess, or Vertigo, Palsy and Apoplexy. A gr. at singularity attendant on it is, that it may and often does continue a greatlength of time without any remission of the symptoms.

CAUSEs,-Grief and uncasiness of mind, in tense study, profuse evacuations, excess in venery, excessive use of spirituous liquors, tes, tobacco, opium, and other narcotics, immediate repletion, over distention of the stomach, a deficiency of the secretion of the bile or generic juice, exposure to cold and damp sir, are the chief causes of this disease.
